- + Scaffold

36 Whitehall

Starting in March 2022, SOL have carried out full internal demolition works to 36 Whitehall, saving and setting aside all historic items, complete with sash window repairs and decoration works.

Full scaffolding was erected to the rear of the building, Horse Guards' yard and over the Amorality cinema where we carried out cleaning to the stonework. This project had to be put to a planned halt in April due to the set up of the concert stages and other festivity planning and set up for The Queen's Platinum Jubilee celebrations.

SOL have worked closely alongside Royal Parks to obtain vehicle permits to cross the horse guard parade.

Works are scheduled to recommence in across July and August where we will rebuild the compound for the last of the demolition works along with all hoarding works with scaffolding to the front elevation of Whitehall to Doff clean the stonework and lightly jet wash the brick work along with a unifying colour wash.
