

Case Study

+ Warehouse & Racking Solutions

GXO - Collie

SOL Services was appointed by GXO to deliver a major warehouse reconfiguration project to support Nestlé's operational changes at the EMG facility, accommodating the introduction of Tails.com Pet Food operations. The project involved a comprehensive industrial fit-out and infrastructure upgrade to enable the smooth relocation and integration of the new customer operation within the live warehouse environment.

Client Benefits

- + Industrial warehouse fit-out and refurbishment
- + Mezzanine floor construction and project management
- + Mechanical and electrical installations
- + Sprinkler system modifications and compliance works
- + Lighting and power infrastructure upgrades
- + Ventilation and extraction system installation
- + Racking modifications and warehouse adaptation works
- + Specialist food-safe finishes and wall systems
- + Portable office installation and utility connections
- + Full site management and phased programme coordination

Services Provided

- + Successful reconfiguration of the warehouse to support a new operational customer within the facility
- + Increased operational capacity and flexibility through the addition of mezzanine and production areas
- + Improved workflow and infrastructure with upgraded power, lighting, and ventilation systems
- + Enhanced compliance and safety through sprinkler modifications and food-safe finishes
- + Efficient integration of production, office, and warehouse environments within a live operation
- + Minimal disruption to ongoing logistics activities due to careful planning and phased delivery
- + Delivery of a fully functional and future-ready operational space supporting GXO, Nestlé, and Tails.com requirements
