

Case Study

- + Commercial Fit-Out & Refurbishment
- + Electrical & Sustainable Energy
- + Mechanical & Renewables

George Eliot Hospital NHS

The project involved a full internal refurbishment and upgrade of key areas within the hospital. Works were delivered in a live healthcare environment, requiring careful planning, coordination, and strict adherence to infection control and safety procedures.

Client Benefits

- + Upgraded environments with improved functionality and hygiene standards
- + Enhanced lighting and ventilation systems
- + Modernised bathroom and washroom facilities
- + Minimal disruption to hospital operations over the 8 week phased delivery
- + Positive client feedback for the project and site management team

Services Provided

- + Strip out and replace all existing ceilings
- + Full upgrade and replacement of lighting systems
- + Installation of new flooring finishes
- + Supply and installation of new Trovex basin units and bathroom fittings
- + Installation of new air handling systems and ductwork within the plant room
- + Full redecoration of all affected internal areas
