

Case Study

+ Warehouse & Racking Solutions

Maersk - Tamworth

SOL Services was appointed by Maersk to deliver an internal refurbishment of one of its warehouse facilities. The project focused on adapting the existing space to support a revised operational layout and improve overall warehouse functionality.

Client Benefits

- + Warehouse layout adapted to support revised operational requirements
- + Improved efficiency with updated workstation and conveyor power infrastructure
- + Enhanced safety measures with upgraded barriers and protection systems
- + Sprinkler system modifications ensuring fire safety compliance
- + Clear line marking improving organisation, traffic management, and safety
- + System brought back into full operational condition in line with design intent

Services Provided

- + Electrical installation and modification works
- + Adaptation of sprinkler and fire protection systems
- + Warehouse fit-out and operational layout modifications
- + Installation of safety barriers and protection systems
- + Internal line marking and demarcation works
- + Site management and coordination within an active logistics environment
- + Programme delivery and stakeholder coordination
