- + Mechanical & Renewables

Plymouth HLMR Reception

SOL Services delivered a full reception refurbishment for Plymouth HM Land Registry, taking the project from design concept through to completion within a tight 4-week programme in a secure, live environment.

Project Details

To maintain business continuity, a temporary reception cabin was installed on site, allowing operations to continue uninterrupted while works were carried out in the existing space. The project involved the full transformation of the reception area, including strip-out, refurbishment, and installation of bespoke new elements, with design adjustments managed dynamically during delivery. All works were undertaken by SC-cleared operatives, ensuring full compliance with site security requirements throughout.

Client Benefits

- + Continued **live operation with zero service interruption**
- + Delivery within a **high-security environment using SC-cleared personnel**
- + Successful completion within a **compressed 4-week programme**
- + High-quality **bespoke reception upgrade tailored to operational needs**
- + Improved **security, acoustics, and visitor experience**
- + Flexible delivery accommodating **live design changes on site**
- + Positive client feedback and satisfaction with the **finished result**
