

Case Study

+ Commercial Fit-Out & Refurbishment

Plymouth HMLR – SFB

SOL Services were appointed by OCS to deliver a full refurbishment of the Staff Food & Beverage (SFB) area at Plymouth HMLR, taking the project from initial design through to completion over a 10-week programme. The works involved the complete strip-out of the existing staff kitchen, as well as adjoining toilet and changing facilities, followed by a comprehensive internal fit-out to create a modern, functional space.

All works were carried out within a live operational setting, requiring careful planning and coordination to ensure minimal disruption. SOL Services worked closely with the on-site team, maintaining clear communication and efficient delivery throughout. The project was completed without issue, and the client expressed satisfaction with both the process and final result.

Client Benefits
